OTHER PROJECTS

L & T'S River is an Erasmus + project whose purpose is to facilitate the transition of students among different education levels with fluvial environments for learning.

European LIFE project that seeks a transition towards an efficient economy in the use of resources. The goal is to make a food based on recycled agricultural waste and reduce CH4 emissions.

PROGRAMA
**emplea
verde**

The objective is to support workers to improve their adaptation to the market by providing new knowledge about obtaining bio-products from agricultural residues from citrus pruning, and contributing to the transition to a green economy.

Enhancing green- skills in VET through citrus waste valorisation

CITRI VET

2018 - 2021

- 1. PROFESSIONAL DEVELOPMENT OF VET TEACHERS
